

Adjustable Height Work Surfaces

Adjustable Height Work Surfaces

The Boulevard Height Adjustable desk system is designed to address the ergonomic needs of computer intense users regardless of their body size and to provide barriers free access for the physically challenged.

Available in increments, crank adjustable and electric styles to suit the most stringent tasks, these desks are ANSI/BIFMA tested. The freestanding desk styles are compatible with all straight BOULEVARD panels or any other panel system in a retrofit application.

Making the workplace more accessible is accomplished through height adjustable workstations for seated and sit-to-stand work postures with the added capacity of accommodating height and tilt adjustable keyboard supports.

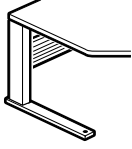

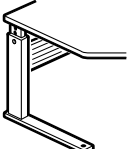

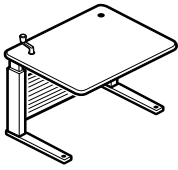

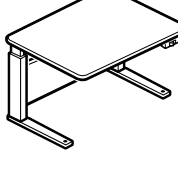

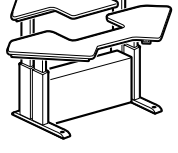

Enjoy the comfort and flexibility provided by these height adjustable desks and improve the physical and psychosocial environments in the workplace.

Model# BWA4224H5

Model# BWA4224JC5

- Various height adjustable mechanisms are available to suit all task.
- Choose the mechanism according to the degree of flexibility required by the user.

ADJUSTMENT MECHANISM	CODE REFERENCE	METHOD OF ADJUSTMENT	RANGE OF VERTICAL ADJUSTMENT	FREQUENCY OF ADJUSTMENT
Fixed 	2	None	None	None
Increment 	3	To adjust the height of the surface, remove the safety pin located on each leg, adjust the surface and replace the pins.	8" Range from 24" to 32" in 1" increments.	Infrequent adjustments
Top Surface Crank 	5	Turn the crank to adjust the height of the surface. The crank is removable and is located on top of the surface on the right side. The crank can be LH or RH use.	12" range from 24" to 36" with infinite adjustments.	Occasional adjustments
Electric 	7	The electrical switch is located on the right underside at the front of the surface. Press the switch to electrically adjust the surface up or down.	Continuous adjustment. 16" range for rectangular surfaces from 27" to 43"	Frequent adjustments
Dual Electric 	8	One electrical switch is located on the right underside and one on the left underside at the front of the surface. Press the switch to electrically adjust the surface up or down. Both surfaces adjust independently with full range of adjustment.	Continuous adjustment. 16" range for corner surfaces from 27" to 43"	Frequent adjustments

* Measured from the floor to the top of the Work Surface
