Cam & Bolt

The Universal cam

Quickfit-TL dowel

- This connector offers a fast assembly system.
- It has a built-in self-adjustment feature.
- The cam turns effortlessly to the full 2 o'clock position.

Steps to install Titus connectors:

- Step 1. Press cam into pre-drilled hole of component with the arrow pointing OUTWARD or UPWARD as per application.
- Step 2. Push bolt into edge hole of same component.
- Step 3. Push aligned components together in order to insert bolt into predrilled hole of side panel, top, or work surface.
- Step 4. Insert Phillips screwdriver into cam.
- Step 5. Turn cam to 2 o'clock to smoothly lock components together. DO NOT OVER TORQUE CAM, HEAD MAY SNAP OFF BOLT.
- Step 6. Snap on cover cap.

Modular Connector (clip) and Shoulder Screw

-
- This connector offers a hidden connection between two panels.
 - The modular connector and a connector screw are used in combination to assemble panels.
 - The modular connector is always pre-installed by the factory.
 - The modular connector is always installed with the WIDE opening oriented at the bottom of the part.
 - The connecting shoulder screw is field installed, based on the application of components.

Steps to install modular connectors:

Step 1. Install connecting shoulder screws at the pre-drilled location as per configuration.

Step 2. Line up shoulder screws to the modular connector in another component.

Step 3. Push components together and push down to lock component in place, using a rubber mallet, if necessary.

Inserta® Hinge & Mounting Plate with Euro Screws

INSERTA - assembly

INSERTA - removal

Height adjustment

Side adjustment

Depth adjustment

- The INSERTA® hinge is a tool-free attachment of hinge to door.
- Individual components and fittings do not need to be assembled until they reach their final destination.
- The mounting plate with Euro screws is easy to install.
- The spring loaded clip makes a simple connection between the door and end panel or divider.

Steps to install hinges:

Step 1. Install all mounting plates using the predrilled holes of end panel and/or dividers by fastening with the Euro screws.

Note: The mounting plate should be oriented with the arrow pointing towards exterior of the unit.

Step 2. Place the door face down. With the lever open press hinge into the pre-drilled holes. Press the lever on the hinge down with your thumb. By closing the lever, the hinge is held firmly in place.

Step 3. Align hinges to mounting plates and push in until a click is heard.

Step 4. Use adjusting screws on the hinge to level the door.

Install the handle(s) in the predrilled holes on the doors or drawers by using the screws provided.

Install the elbow catch on the left hand door at the upper right corner with the screws provided.

2X2X2
2X2X6

- Used to reinforce the assembled unit.
- The 2x2x2 brackets are used to connect the modesty panel with the work surface by using the #8 x 5/8" wood screws.
- The 2x2x6" brackets are used to hold the work surface of all reception desks with the end and back panels with #8 x 5/8" wood screws.
- Line up the brackets with the pre-drilled pilot holes on the modesty panel, back, or end panels.

- Used to connect two adjoining worksurfaces using the flat brackets and #8x3/4" wood screws
- The flat bracket is installed under the worksurface.
