GLOBALContract

GLOBALContract

App - add some personality and versatility to your office

A generous selection of stains and aniline dye finishes - the same ones available in Global Contract's Viceversa line of mobile furniture - further expands the design possibilities available with App.

Featuring a crafted maple veneer shell, App™ enhances the qualities of wood with a striking design. The elegantly contoured chair incorporates cutouts of varying configurations to create multiple back options, each with a distinctive personality. The seat can be specified to expose the simplicity of the wood, or with an upholstered pad for added comfort. App offers the permanent look and feel of wood, yet is lightweight enough to be stacked easily. It can be ganged to achieve precise alignment when placed in a row. Guest seating, auditoriums, dining areas, conference facilities - all lend themselves well to App's inherent versatility.
