Boulevard and Viceversa Enhancements

Base power panel entry
Boulevard panels can be connected to a power source easily and unobtrusively - regardless of where it's situated.

Flexible lighting
Versatile lamps complement Boulevard's aesthetics and give users precise control over how their workspace is illuminated.

Optional PVC
vertical end trim finishes the ends of all panel runs as well as two-and three-panel corner connections. End trim is colour-matched to all Boulevard frame colours.

Magnetic task lighting
Boulevard's magnetic task lighting can be attached anywhere under overhangs to direct light wherever it's needed.

Desk-height power panel entry
Desk-height power entry makes it easy for workers to plug in equipment without having to wrestle with a tangle of wires below worksurface.

Pivoting tables
To increase work area, mobile pivoting tables can be attached to any point on an adjacent worksurface without tools or additional hardware.

Communications raceway
The innovative desk-height raceway delivers power just above - not underneath - the worksurface, making installation of electrical and communications cables remarkably simple.

Mobile filing pedestal
The top of the mobile filing pedestal slides out for an instant worksurface. Below is a box drawer and file drawer, giving users a versatile storage unit that can be moved quickly when needs change.

Modesty panel casual wire management
An optional modesty panel adds an extra dimension to freestanding desks. Wires are completely concealed in troughs built into the worksurface and legs.

Adjustable monitor stand
A pneumatic mechanism can be built into Boulevard worksurfaces, allowing monitors to be raised or lowered to suit individual requirements.

GLOBALContract

The workplace is changing and so are we. New solutions in filing and storage.

The modern office continues to change and evolve. At Global Contract, we are pleased to introduce Boulevard's new storage. Our new Radius pedestal and scissor action overhead both with soft touch handles add a human sense to any environment. The softening of our storage design complements curvilinear surfaces to meet the demands of today's multi-functional work environments. From high density open office applications to fully enclosed private offices, Boulevard Systems are known for their unparalleled strength and rigidity, low cost of ownership, breadth of product application and multitude of finishes. Numerous workflow shapes are available for principal and secondary surfaces, computer applications and transaction tops. Choose between laminate with PVC edge, laminate with wood edge or complete wood in an impressive selection of colours and finishes. For specific sizes and specifications, consult your Global Contract Pricing Guide.
