

SEPTEMBER 2008 **PRESS RELEASE**

GLOBAL CONTRACT SHOWN AT IIDEX 2008 --'VERSAILLES'

MARKET APPLICATION

Any type of executive office environment with transitional or contemporary decor.

DESIGN + INNOVATION

Completely redesigned, VERSAILLES presents a simple yet powerful aesthetic with enhanced design options that allow virtually unlimited planning flexibility. VERSAILLES' standard veneer offering has been expanded to include Bamboo, Lyptus, Anigre, White Rift Oak, Cherry, Maple and Walnut in 30 finishes. VERSAILLES is available as FSC (Forest Stewardship Council) certified and contributes to LEED certified wood credit. Choice of Bamboo or reconstituted veneer both qualify for renewable materials credit; optional Greenguard materials and finish package contribute to LEED (Leadership in Energy and Environmental Design) indoor air quality. Enhanced features include new edge details, handle options, doors and drawers in full overlay construction for a clean uncluttered look. An expanded offering of freestanding storage components provide the flexibility to specify Versailles in either a collaborative or private office environment.
